

MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and
Atmospheric Administration/National Environmental
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: MARCH 26, 2012
REPORT TIME: 2045Z (1545 CDT)
ANALYST: VOGT

DATA SOURCE: MODIS TERRA
MODE: MULTI-SPECTRAL
RESOLUTION: 250 METER
IMAGE DATE/TIME: 3/26/2012 1650Z (1150 CDT)

Legend

-  Possible Oil
-  False-Positives (not oil)
-  Suspected Point Source:
[28°55'48" N / 88°58'12" W]

REMARKS:

A suspect anomaly is seen in the latest MODIS Terra pass. This anomaly is likely originating from a known leak source located just southeast of Louisiana's Bird foot region. The anomaly appears largest closest to the point source and then extends to the southwest approximately 16.5 miles. The direction of the anomaly is consistent with ocean surface currents as well as surface wind data close to the time that the image was taken.
